# ServerTrac™ Kit

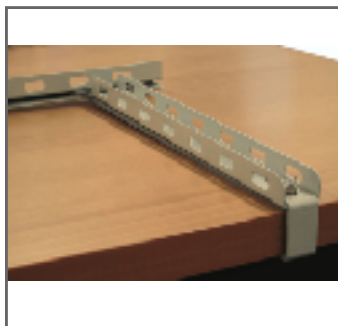

**STKE1 24S, STKE1 28S,  
STKE2 24S, STKE2 28S,  
STKE3 24S, STKE3 28S**

## PRODUCT FEATURES

- *Secures critical equipment to countertops*
- *Quick and easy moving and changeout of equipment without use of adhesives*
- *Painted steel hardware*
- *Side tracks can be moved or relocated quickly and easily*
- *Multiple items can be secured using only a single pair of side tracks*
- *Also available by individual components*

Completely adjustable to suit changing needs

Side Track slides into place in back track and edge clip secures the side track

Steel snap hook easily attaches strap to track

Strap is adjusted with the steel cam buckle

The ServerTrac™ system allows quick and easy adhesive-free securing of equipment to countertops. All components are completely reusable and all straps adjust to suit changing needs.

The system consists of a back track, side tracks, edge clips and a ServerTrac™ Strap. Back track is 24" long (can be custom made) and can be drilled into the countertop or adhered with its' 3M® VHB™ adhesive backing.

Side tracks are 24" or 28" to cover a wide range of countertop depths (can also be custom made). The side tracks slide into the back track to fit the width of the item(s) to be secured. The edge clamp (also available in different sizes) is then secured to the side track.

## SPECIFICATIONS
