**"Quick-release" buckle
for instant access**

**Swivel action allows
easy monitor adjustment**

**Steel snap hook
easily attaches strap to track**

**Attaches to monitor
with swivel "T" clip**

The ServerTrac™ Monitor Swivel-Straps™ are designed to secure monitors to the desktop surface or to LAN rack shelving.

The swivel plates adhere to the sides of the monitor. The strap will swivel to conform to the best directional pull. Since the pull is from the center of the plate, the adhesive holding power is maximized.

The other end of the strap hooks into a back track or side track (available separately).

The straps can be detached at the quick-release buckle or at the hook end for easy access.

Available colors: black, putty.
