LabTrac™ Kit

**LTKE1 24S, LTKE1 28S,
LTKE2 24S, LTKE2 28S,
LTKE3 24S, LTKE3 28S**

PRODUCT FEATURES

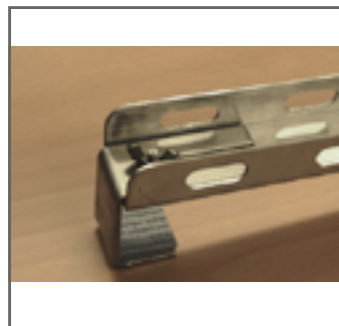

- *Secures critical test equipment to lab benches*
- *Quick and easy moving and changeout of equipment without use of adhesives*
- *Bio-Coated TekStraps™ are non-corrosive, easy to clean, and will not host bacteria or fungus*
- *All Stainless steel hardware*
- *Side tracks can be moved or relocated quickly and easily*
- *Multiple items can be secured using only a single pair of side tracks*
- *Also available by individual components*

Completely adjustable to suit changing needs

Side Track slides into place in back track

Edge clip secures side track

Stainless steel snap hook easily attaches strap to track

The LabTrac™ system allows quick and easy adhesive-free securing of equipment to countertops. All components are completely reusable and all straps adjust to suit changing needs.

The system consists of a back track, side tracks, edge clips and a TekStrap™. Back track is 24" long (can be custom made) and can be drilled into the countertop or adhered with its' 3M® VHB™ adhesive backing.

Side tracks are 24" or 28" to cover a wide range of countertop depths (can also be custom made). The side tracks slide into the back track to fit the width of the item(s) to be secured. The edge clamp (also available in different sizes) is then secured to the side track.

SPECIFICATIONS

Track sections:	Stainless steel
Back Track: □	24" long
Side Track: □ □	24" - LTKE1 24S, LTKE2 24S, LTKE3 24S 28" - LTKE1 28S, LTKE2 28S, LTKE3 28S
Edge Clamp: □	E1 = 1" I.D. E2 = 1.25" I.D. E3 = 1.5" I.D.
Straps: □ □ □ □	1" x 60" Bio-coated TekStraps™ w/(1) cam buckle and (2) Stainless steel snap hooks
