TSML 1124P

**Painted steel  
clip and acetal resin  
side release buckle**

TSML 1124BSC

**Steel cam buckle,  
Stainless steel clip  
& triglide**

This TekStrap™ Lasso wraps around the item's neck or base connecting it to a swivel clip adhered to the backplash or countertop of the work bench. This fastening system is ideal for Pharmaceutical, Biotech, and Clean Room environments because of its' cleanliness and adaptability.

TekStraps are made of a special non-corrosive and non-porous coated material that does not absorb liquids and prevents the growth of fungus and bacteria.

The clip and side-release buckle allow quick and easy mobility and exchange of items to other clips making it extremely flexible and efficient. There are no adhesives to remove on the item if it needs to be serviced or relocated.
