# Super Unibracket™ Floor Anchoring Kits

**UBF 2209S, UBF 4209S**

## PRODUCT FEATURES

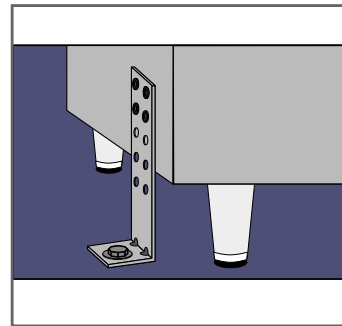

- *Designed to anchor large equipment in laboratories or clean room environments*
- *Stainless steel prevents corrosion problems*
- *Directly anchor item to the floor or to a Unistrut® channel*
- *Wide shape offers more stability than commercially available "L" brackets*

**Stainless steel brackets & plated steel hardware**

**Can be combined with other fastening kits**

**"2-point" offset or "4-point" floor fastening**

This Stainless heavy gauge steel bracket system allows external fastening of large and tall lab equipment such as refrigerators, incubators, etc. simply bolt anchor to the floor.

Another option would be to secure a Unistrut™ or U-channel grid on the concrete subfloor instead of bolting each cabinet into a separate seismic anchor.

IsoRods™ are a convenient way to secure through a raised access floor and into a concrete subfloor.

The brackets are corrosion-proof making them ideal for use in laboratories or clean room environments where corrosion is a problem.

## SPECIFICATIONS

- Brackets:** 10 Gauge Stainless steel with bright finish
- 1-7/8" x 9" high with a 2.75" base
  - (10) 3/16" slotted holes
  - (1) 5/8" slotted base hole
  - (2) brackets per kit
- Anchors:** (2) Seismic rated drop-in concrete anchors

Kit includes all Stainless steel hardware

"2-point" offset fastening kit - **UBF 2209S**  
"4-point" fastening kit - **UBF 4209S**
