## TekStrap™ Rack Strap

TSRSS 2118BC, TSRSS 2118PC

### PRODUCT FEATURES

- *Bio-coated TekStraps™ are non-corrosive, easy to clean, and will not host bacteria or fungus*
- *Adjustable*
- *Swivel cam locking buckles*
- *Available in black or putty*
- *Kits include all hardware*

These Rack Straps are constructed of high strength Poly-coated Nylon webbing with a snap hook one end and a special swivel mounting cam buckle on the other end. The cam buckle automatically locks the strap in place after it is pulled to size. The straps are easily hooked and unhooked when moving furniture to access wires or electrical outlets. In most cases these straps can be installed out of view for better aesthetics.

These straps are especially useful when securing furniture that is placed away from walls or in corners where other brackets can't reach.
