# Seismic Cylinder Restraint for "In Lab" Use

TH 10S

## PRODUCT FEATURES

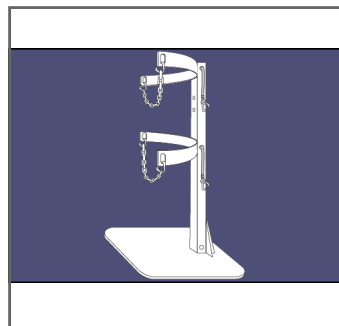

- All Stainless steel construction
- Anchors to side of lab bench or to a wall
- Restrains gas cylinders 10" - 12" in diameter
- Top restraint band adjusts for tall or short cylinders

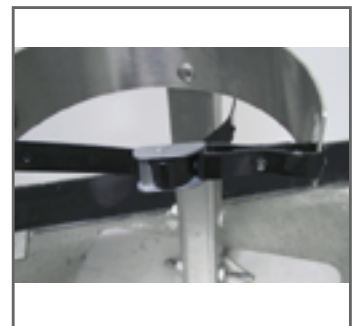

Adjustable back frame

Easy access with  
steel chain and quick link

Corrosion Resistant

Non-slip TekStrap™  
keeps tank in place

For use inside lab areas. Can be used alone or ganged together with additional cylinders.

All Stainless steel construction makes these tank holders ideal for use inside lab areas.

Tanks can be easily moved in and out.

Uses less floor space than standard storage racks.

Tank restraint is anchored to the wall, wall channel, or lab bench with hardware provided.

Tank holders can be custom made. Ask your WorkSafe Technologies representative for details.

## SPECIFICATIONS

All Stainless steel construction.

**Strap:** 1" pre-punched TekStrap™ with steel cam buckle

Ask your WorkSafe Technologies representative for details.
