# Fire Extinguisher Strap Kit

**FXS 1126Y**

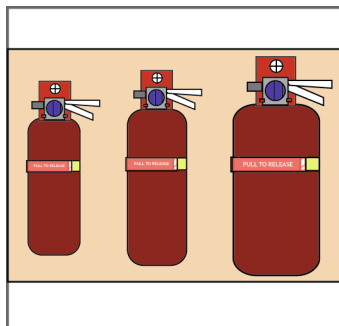

## PRODUCT FEATURES

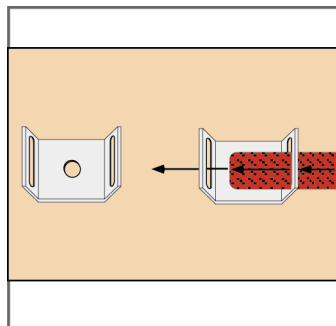

- Prevents fire extinguisher from falling out of mounting bracket and causing damage
- Quick-release Velcro® allows easy access to unit when needed
- Simple installation
- Kit includes all hardware and special mounting bracket

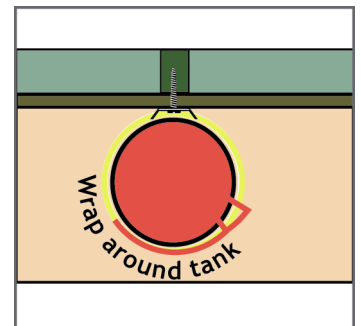

Easy to read quick-release strap

One size strap fits any standard tank up to 7"

Simply slide strap through wall plate

Mount bracket to wall stud or use toggler

This Fire Extinguisher Strap Kit secures the fire extinguisher to the wall preventing it from jumping off the mounting bracket and getting damaged. The quick-release Velcro® fastener has a tab that allows quick access to the unit when needed.

One size strap fits around any standard fire extinguisher tank up to 7" in diameter.

The strap is easy to install, simply attach the mounting plate to the wall, slip the strap through the mounting plate and wrap the strap around the tank.
