TV Monitor SwivelStraps™

TV 2124B

PRODUCT FEATURES

- Holds front and top heavy TV monitors in place
- Heavy Nylon strapping will not stretch
- "Quick-release" buckles for instant access
- Swivel-plate adjusts to pull from any direction
- Kits include all hardware

TV SwivelStraps™ are the ideal way to secure TV monitors up to 32" to a wall stud, inside an entertainment center, or to a ceiling mount stand.

The swivel plate can be adhered in any convenient location on both sides of the monitor and then screwed securely to the wall stud. The strap will then swivel to conform to the best directional pull. Since the pull is from the center of the plate, the adhesive holding power is maximized.

The straps can be detached at the buckle for easy access.
