# GripLip™ Shelf Edge Protectors

GLE 35S, GLA 35S

## PRODUCT FEATURES

- Ideal for legal or medical client files in shelving units
- Makes shelf the right proportional size, preventing file slippage
- Quick installation; shelf protectors simply mount on shelf face with 3M®VHB™ adhesive
- Durable friction surface keeps the files from sliding forward
- Rolled front edge allows for easy removal and replacement of files

Fits standard shelves

Without GripLip™ items can easily fall to the floor

GripLip™ holds files in place

Flush shelf mount

During even a moderate earthquake, files, charts, books and folders only need to slide forward a few inches to begin dumping from the shelf. Often the shelves are shorter than the files.

GripLip™ shelf extensions are ideal for legal or medical client files in standard open faced file shelving units that are designed to let the folders overhang the shelf edge a few inches.

GripLip™ shelf extensions mount to the shelf face and make the shelf the right proportional size for the files on the shelf. These shelf extensions also have a raised front lip that prevents forward sliding and a GripStrip™ high friction mat on the top edge which further adds resistance to sudden seismic motions. The rolled edge allows for easy removal and replacement of files due to its smooth polished surface.

## SPECIFICATIONS

**Shelf Extension:** 3" x 35" Quality Stainless steel  
GLE 35S□ Kit includes hardware

**Shelf Protector:** 3" x 35" Quality Stainless steel  
GLA 35S□ 3M® VHB™ adhesive

**GripStrip™:**□ High-friction PVC foam with  
□ tear-resistant polyester scrim
