GripStrip™ Hidden Shelf Contents Restraint

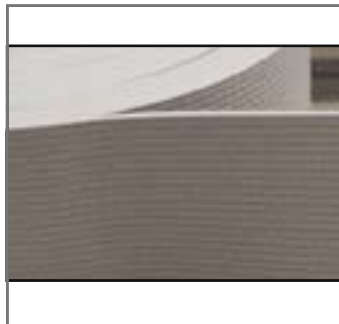

**GS 4512B, GS 4512P,
GS 4585FTB, GS 4585FTP**

PRODUCT FEATURES

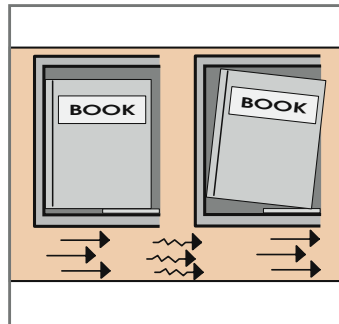

- *Creates friction for contents placed on shelf*
- *Convenient alternative to other shelf restraint systems that require a two-hand operation to access shelf contents*
- *Quick installation; simply cut to size and place on shelf*
- *GripStrip™ is anti-bacterial and anti-fungal*
- *Can be used in ESD environments, as it does not create static*
- *Passed UBC Shake Table Testing, July 1998*
- *Works better than bungee cords*

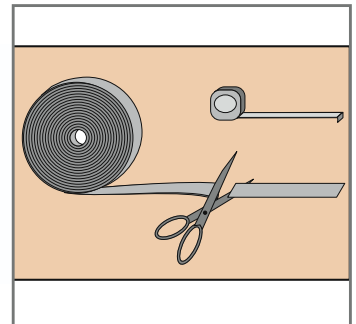

Ideal for bookshelves

Available in 2 roll lengths

Prevents forward sliding

Simply cut GripStrip™ to size

GripStrip™ placed on the front leading edge of a shelf creates friction for contents placed on it such as books, potted plants, etc; the increase in drag slows the contents from sliding off of a shelf.

GripStrip is a convenient alternative to other restraint systems such as bars, straps, or nets that require a two-hand operation to access shelf contents.

This adhesive-free material sits neatly under books or other items near the front edge of shelving creating a very strong friction grip to both the shelf and the books.

GripStrips™ are adhesive-free therefore harmless to the item's surface.

SPECIFICATIONS

GripStrip™: High-friction PVC foam with tear-resistant polyester liner

GS 4512: (1) 4-1/2" W cut-to-size GripStrip. Please specify length needed.

GS 4585FT: (1) 4-1/2" W x 85' L cut-to-size roll of GripStrip. Enough for up to (28) 36" shelves.
